Auxiliary Station Apparatus
============================

QUS1B-type Handsfree Unit	The "Companion" is a stand-alone speakerphone unit compatible with single-line and multi-line analog telephone sets. Auxiliary contacts are provided for key system control, ringer silencing, etc. Available in ivory, ash and beige.
NTOC26-type Autodialer	The "Index" dialer is a stand-alone unit compatible with single-line and multi-line analog telephones. The unit features one-button access to 31 frequently used numbers, two-digit code access to an additional 17, last number redial, call timer and speaker for on-hook dialing. Available in ash.
QUS1C-type Handsfree Unit	The "Logic" handsfree is a module designed to plug into the left-hand side of a "Logic 10" or "Logic 20"

key telephone set, or "Logic" autodialer. Available
in ash and warm white.

NTOC25-type **Autodialer**	The "Logic" dialer is a module designed to plug into the left-hand side of a "Logic 10" or "Logic 20" key telephone set. Features are identical to those of the "Index" dialer described above. Available in ash and warm white.
QUB1B-type **Busy Lamp Field**	The "Logic" busy lamp field is a module designed to mount on the right-hand side of a "Logic 10" or "Logic 20" key telephone set. Often used to display station status, the unit features two rows of ten illuminated, non-locking buttons which may be used for signalling. Available in ash and warm white.
6041QAA **Key**	The 6041QAA is a 6-button separately-mounted key, for wall or desktop use, which enables an analog, single-line telephone with auxiliary hookswitch contacts to function as a 6-button key telephone set. Stocked in black; other colours available.
6050A **Key**	The 6050A is a 12-button·separately-mounted key, for wall or desktop use. The unit is equipped with a 5'6" 25-pair mounting cord with Amphenol plug. Available in black only.
Plantronics **Jack Set**	The Plantronics "JackSet" allows a suitable Operator headset to be used with any single-line or multi-line analog telephone set. A switch on the unit provides on/off and handset/headset selection. ("Logic" sets are available with built-in headset capability.)
E1A-49 Ringer	The E1A is a single-gong, high impedance, adjustable ringer. Designed for baseboard mounting, the unit comprises a base, ringer, capacitor, terminal strip, and olive grey plastic cover.

1A2 Key Equipment
==================

QUN10D **Key Telephone Unit**	Standard 1A2 features card for CO or PBX line with metallic ringing. Includes line status LED, link-programmable options.
QUN11A **Key Telephone Unit**	Manual intercom card: provides talking path. Relay can be used to control lamp and external circuit from A-lead ground.
QUN13A **Key Telephone Unit**	Tie line card: provides lift-to-ring tie line to QUN13A at distant location. Works on copper loop up to 2200 ohms resistance.
QUN14A **Key Telephone Unit**	Automatic intercom card: provides lift-to-ring intercom service between two stations on the same premises.
QUJ8A **Key Service Unit**	Four-slot 1A2 package for small key systems. Consists of 15" x 8" x 6" hinged cabinet with power supply, interrupter, card jacks and connecting block. Ringing

generator is not provided.

QUJ9A **Key Service Unit**	Seven-slot 1A2 package: includes power supply, card jacks, interrupter and connecting blocks on metal base with hinged gate and 17" x 14" x 10" fiberglass cover. Ringing generator is optional.
QUJ10A **Key Service Unit**	Fourteen-slot 1A2 package: power supply, card jacks, interrupter and connecting blocks on metal base with hinged gate and 17" x 26" x 10" fiberglass cover. Ringing generator is optional.
QPC Series **Key Service Panels**	Key service panels are rack-mountable modules which provide 13 to 15 card slots each. Master panels also include interrupter and power distribution fusing. Each panel occupies 4" vertical space in a 23" rack or apparatus mounting.
